DEFINITIONS

Indirect ownership interest in a particular entity (the relevant entity) means an ownership interest in another entity that has an ownership interest in the relevant entity. This term includes an ownership interest in any entity that has an indirect ownership interest in the relevant entity.

Ownership interest in an entity means the possession of equity in the capital, the stock, or the profits of the entity.

An **ownership or control interest** in an entity means a person or corporation (a) has an ownership interest totaling 5% or more in the entity; (b) has an indirect ownership interest equal to 5% or more in the entity; (c) has a combination of direct and indirect ownership interests equal to 5% or more in the entity; (d) owns an interest of 5% or more in any mortgage, deed of trust, note, or other obligation secured by the entity if that interest equals at least 5% of the value of the property or assets of the entity; (e) is an officer or director of the entity if it is organized as a corporation; or (f) is a partner in the entity if it is organized as a partnership. Please see *NOTE: Determination of Ownership or Control Percentages* below to help determine the amount of an interest.

Subcontractor of an entity means an individual, agency, or organization to which the entity has contracted or delegated some of its management functions or responsibilities of providing medical care to its patients.

Supplier means an individual, agency, or organization from which a provider purchases goods and services used in carrying out its responsibilities under Medicaid (e.g., a commercial laundry, a manufacturer of hospital beds, or a pharmaceutical firm).

Wholly owned supplier means a supplier whose total ownership interest is held by a provider or by a person, persons, or other entity with an ownership or control interest in a provider.

NOTE: Determination of Ownership or Control Percentages

(a) Indirect ownership interest. The amount of indirect ownership interest is determined by multiplying the percentages of ownership in each entity. For example, if A owns 10% of the stock in a corporation which owns 80% of the stock of the disclosing entity, A's interest equates to an 8% indirect ownership interest in the disclosing entity and must be reported. Conversely, if B owns 80% of the stock of a corporation which owns 5% of the stock of the disclosing entity, B's interest equates to a 4% indirect ownership interest in the disclosing entity and need not be reported.

(b) Person with an ownership or control interest. In order to determine percentage of ownership, mortgage, deed of trust, note, or other obligation, the percentage of interest owned in the obligation is multiplied by the percentage of the disclosing entity's assets used to secure the obligation. For example, if A owns 10% of a note secured by 60% of the provider's assets, A's interest in the provider's assets equates to 6% and must be reported. Conversely, if B owns 40% of a note secured by 10% of the provider's assets, B's interest in the provider's assets equates to 4% and need not be reported.
